

## **AYINA THINK TANK – OUR VISION**

There are experts on what was, there is no certain expert on what will be. In order to become an expert on the future, vision must replace experience; that is why the Ayina Think Tank is assisting the mounting generation to develop with the help of the invisible and visible mentors using the actions and behaviors of individual participants as well as focusing on the group of which they are members:

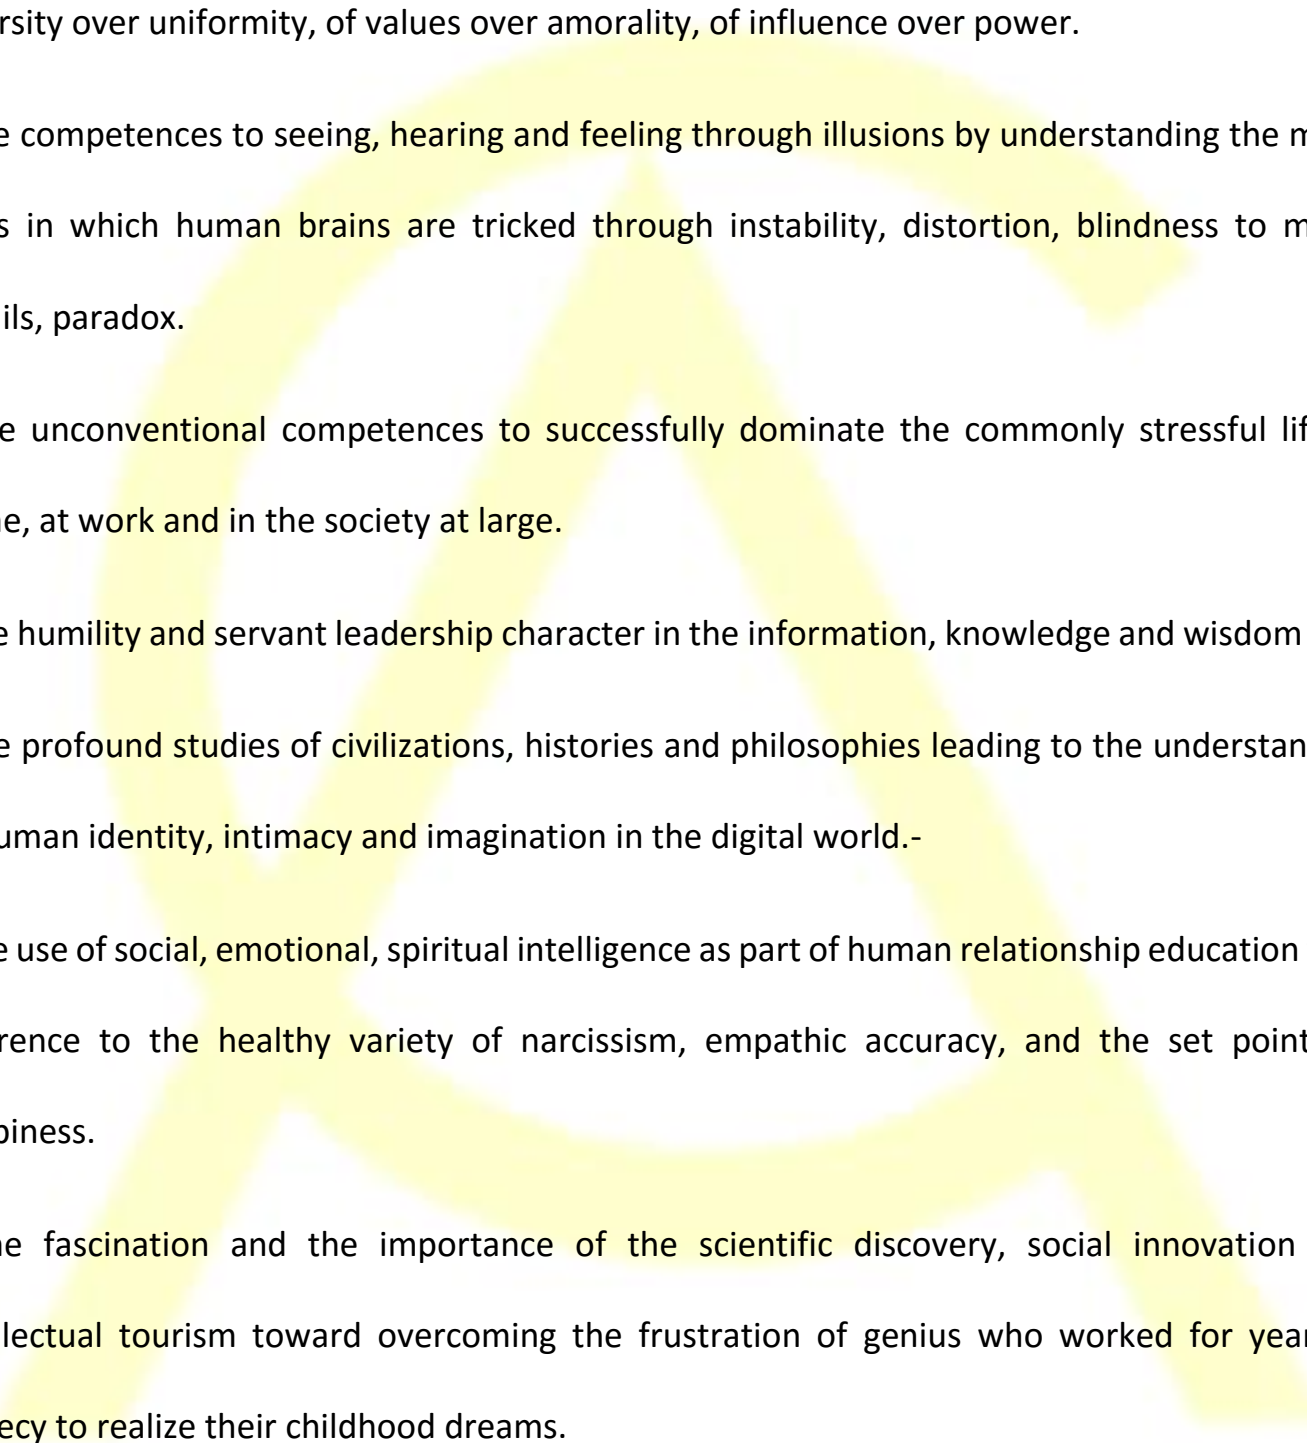

-The courage to see what is not and ask why not, the ability to look beyond their position and identity to see what role they can play as global citizens by starting in their homes and local communities to build a better future.

-The vision to set a new direction, for self, family, organization or community, and planet with the attitude of building and not just to critique.

- The capacity to scale the walls that stand in their way and to deploy not just skills and knowledge, but all parts of their services and contributions toward success, happiness and positive transformation of the world.

-The intuition to step into the unknown and without knowing all the answers by nurturing their six senses for overcoming effectively the unseen forces that stand in the way of true inspiration, innovation, creativity and greatness.

- The grit to hold steady in the face of both the seductions and threats and to develop the capacity of staying alive through the dangers of leading positive change in the society.

- 
- The skills to connect, think and link people, opportunities and their life principle by recognizing the importance of collaboration over isolation, of information over the traditional capital, of diversity over uniformity, of values over amorality, of influence over power.
  - The competences to seeing, hearing and feeling through illusions by understanding the many ways in which human brains are tricked through instability, distortion, blindness to minor details, paradox.
  - The unconventional competences to successfully dominate the commonly stressful life at home, at work and in the society at large.
  - The humility and servant leadership character in the information, knowledge and wisdom age.
  - The profound studies of civilizations, histories and philosophies leading to the understanding of human identity, intimacy and imagination in the digital world.-
  - The use of social, emotional, spiritual intelligence as part of human relationship education with reference to the healthy variety of narcissism, empathic accuracy, and the set point for happiness.
  - The fascination and the importance of the scientific discovery, social innovation and intellectual tourism toward overcoming the frustration of genius who worked for years in secrecy to realize their childhood dreams.
